

# OMEGA ROOFINGS

Omega home decors is one of the largest wholesale and retail distributors of ceramic roofing tiles in Kerala, India. Clay tiles are produced by baking moulded clay. The density of the clay is determined by the length of time and temperature at which it is heated. The colour of the clay tiles ranges from shades of white, yellow, orange and brown. The most commonly used clay colour is Terra-Cotta. Another alternative to these natural earth tones is to add enamels to the tile and make any colour of roof tiles. This process is called “Ceramic” and consists of spraying enamel over the tile before baking it. High temperatures of the kiln permanently bond this colour to the clay tile so it will not peel or fade. As a result there are a wide variety of tile profiles, styles and colours. Because clay tiles are made from natural earth-derived material, they are environmentally friendly and easily recycled. Clay tiles are resistant to strong winds and cannot be destroyed in a fire. Because of the way they are shaped clay tiles protect the underlayment of your roof, and isolate the heat or cold from being transferred to your home.

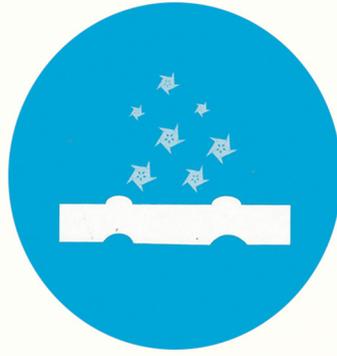

### Omega Ceramic roofing tiles size chart

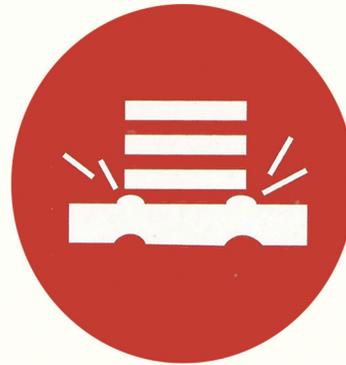

● Size	300 x 400mm or 11.8”*15.7”	● Working Life	More than 70 years in design
● Thickness	10mm or Colors	● Kg/pc	2.25
● Color	More than 39 colors	● pcs/m <sup>2</sup>	10
● Material	Clay, Ceramic	● pcs/ctn	10
● Surface	Glazed	● OEM	Accept

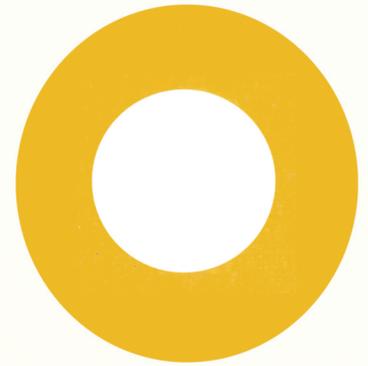

**Water Resistance**

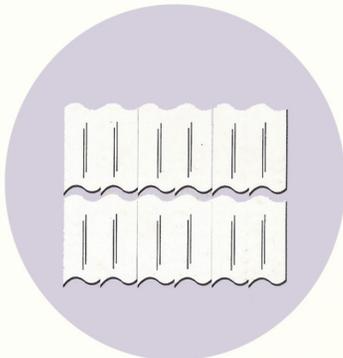

**Cold Resistance**

**Pressure Resistance**

**Never Fade**

**Easy to be constructed**

**Ten Main Features of European Style Interlocking Tiles**

**Sound insulation**

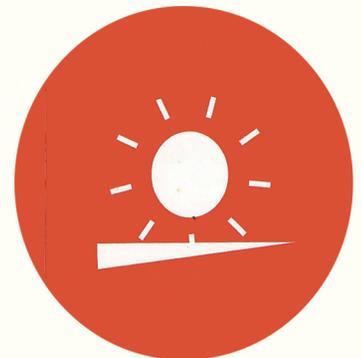

**Smooth and Clean Glaze**

**Multiple Colours**

**Corrosion Resistance**

**Heat insulation**

**ADVANTAGE OF CERAMIC ROOF TILES**

- Water Absorption about 6% only
- Weight less than concrete roof tile
- Colour Longevity and Luxury Appearance
- Durability above 50 years
- Available in multicolour
